AS A SYSTEM IN THE CITY

DESIGN CRITERIA

DESIGN CRITERIA

RESEARCH QUESTIONS

- 1. What requires an IoT object to be part of the citizenship?*
- 2. How should IoT objects in the city co-perform with a human in an one-on-one interaction?*
- 3. How should a small system (~ 3 objects) of IOT objects operate together in a city environment?*
- 4. Do the developed Design Principles contribute to the design process of IoT objects?*
